## Future Software Engineer

Currently student in 5th and last year of my studies in software engineering cycle, I'm searching for an end-of-studies internship .I chose mobile development as a specialty and I really enjoy it . I have a good experience working with Flutter and Native Android ,acquired thanks to my academic projects and freelance experience .I also have some graphic design and web development skills that I developed during my first years at the university. I am a very curious person, I always want to learn new things and new technologies and work with them to develop my skills. I like working in a team, it allows me to learn new things among other things. I am also very dynamic, and good communicator.
